

Acrovyn[®]

Wall & Door
Protection

*Healthy
wall protection
can still be
beautiful.*

Having trouble figuring out which wall protection is safe for the environment?

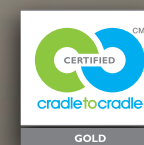

Not with Acrovyn®!

Acrovyn 4000 contains no halogens, monomers or other known persistent bioaccumulative toxins (PBTs) and is UL Class A/1 fire rated and labeled.

That's because some manufacturers are making environmental claims that will confuse you. Not us. Acrovyn 4000 was thoroughly tested by McDonough Braungart Design Chemistry (MBDC), who offers one of the industry's most comprehensive third-party environmental evaluations. MBDC analyzed all Acrovyn 4000 components to 100 parts per million (not just the base resin) and found that they contain no PVC, PBTs or other harmful chemicals*. C/S is committed to selling only Acrovyn 4000 while other wall protection manufacturers continue to sell PVC and are unwilling to disclose what chemicals their product options contain. In addition

to material health, MBDC also evaluates other aspects of how a company operates including material reutilization, renewable energy use, water stewardship and social responsibility before a product is certified. The result: Acrovyn 4000 is the only wall protection system that is MBDC Cradle to Cradle Certified™ Gold or Silver. Dedicated to environmental leadership,

C/S is committed to developing products that have no negative impact on buildings and their occupants and has voluntarily been ISO 14001 certified. So if protecting people is as important as protecting your walls, choose Acrovyn.

**See test results at www.c-sgroup.com/acrovyn/results*

Environmental Achievements

C/S was awarded Practice Greenhealth's Champion for Change Award for the past three years and EPA's 2011 Mid-Atlantic Environmental Achievement Award. Acrovyn 4000 was recognized as one of the Top 10 Green Building Products of 2010 by Sustainable Industries magazine and won Architectural Products' 2011 Product Innovation Award.

"Imagine: Cancer treatment centers built without materials linked to cancer..."

Inspired by this statement from Green Guide for Health Care, C/S is offering Acrovyn 4000 SM-20 corner guards in the new #235 Pink Ribbon color. A portion (10%) of the proceeds from "Project Pink" will benefit the National Breast Cancer Coalition Fund. (www.BreastCancerDeadline2020.org)

Designers and owners love Acrovyn® 4000's new texture.

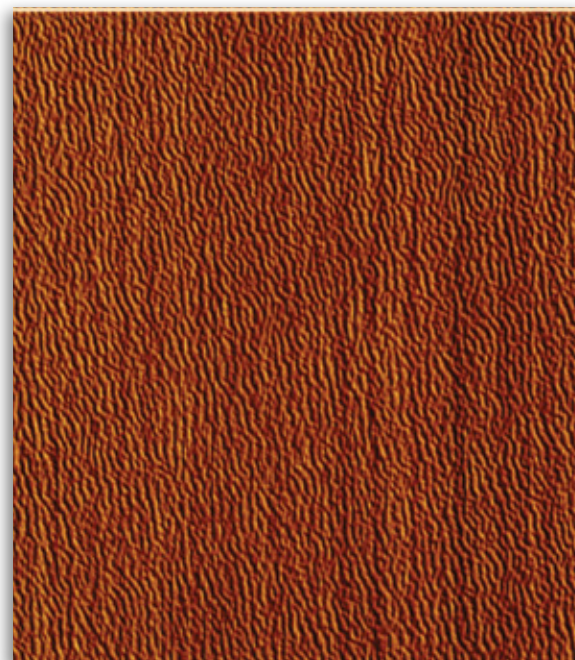

The new texture is easier to clean and maintain.

We understand that people use wall protection because they need it, but we also know how important aesthetics are to our customers. **Acrovyn 4000 now has a contemporary new texture that designers and owners overwhelmingly prefer over other companies' wall protection with pebblette texture.** Owners find the reduced surface texture much easier to clean and maintain. Acrovyn 4000's new texture also improves color consistency between the end cap and profile and makes our Chameleon simulated wood and metal patterns more realistic than ever. Yet another advancement from C/S, the inventor and leader in modern wall protection for over 40 years.

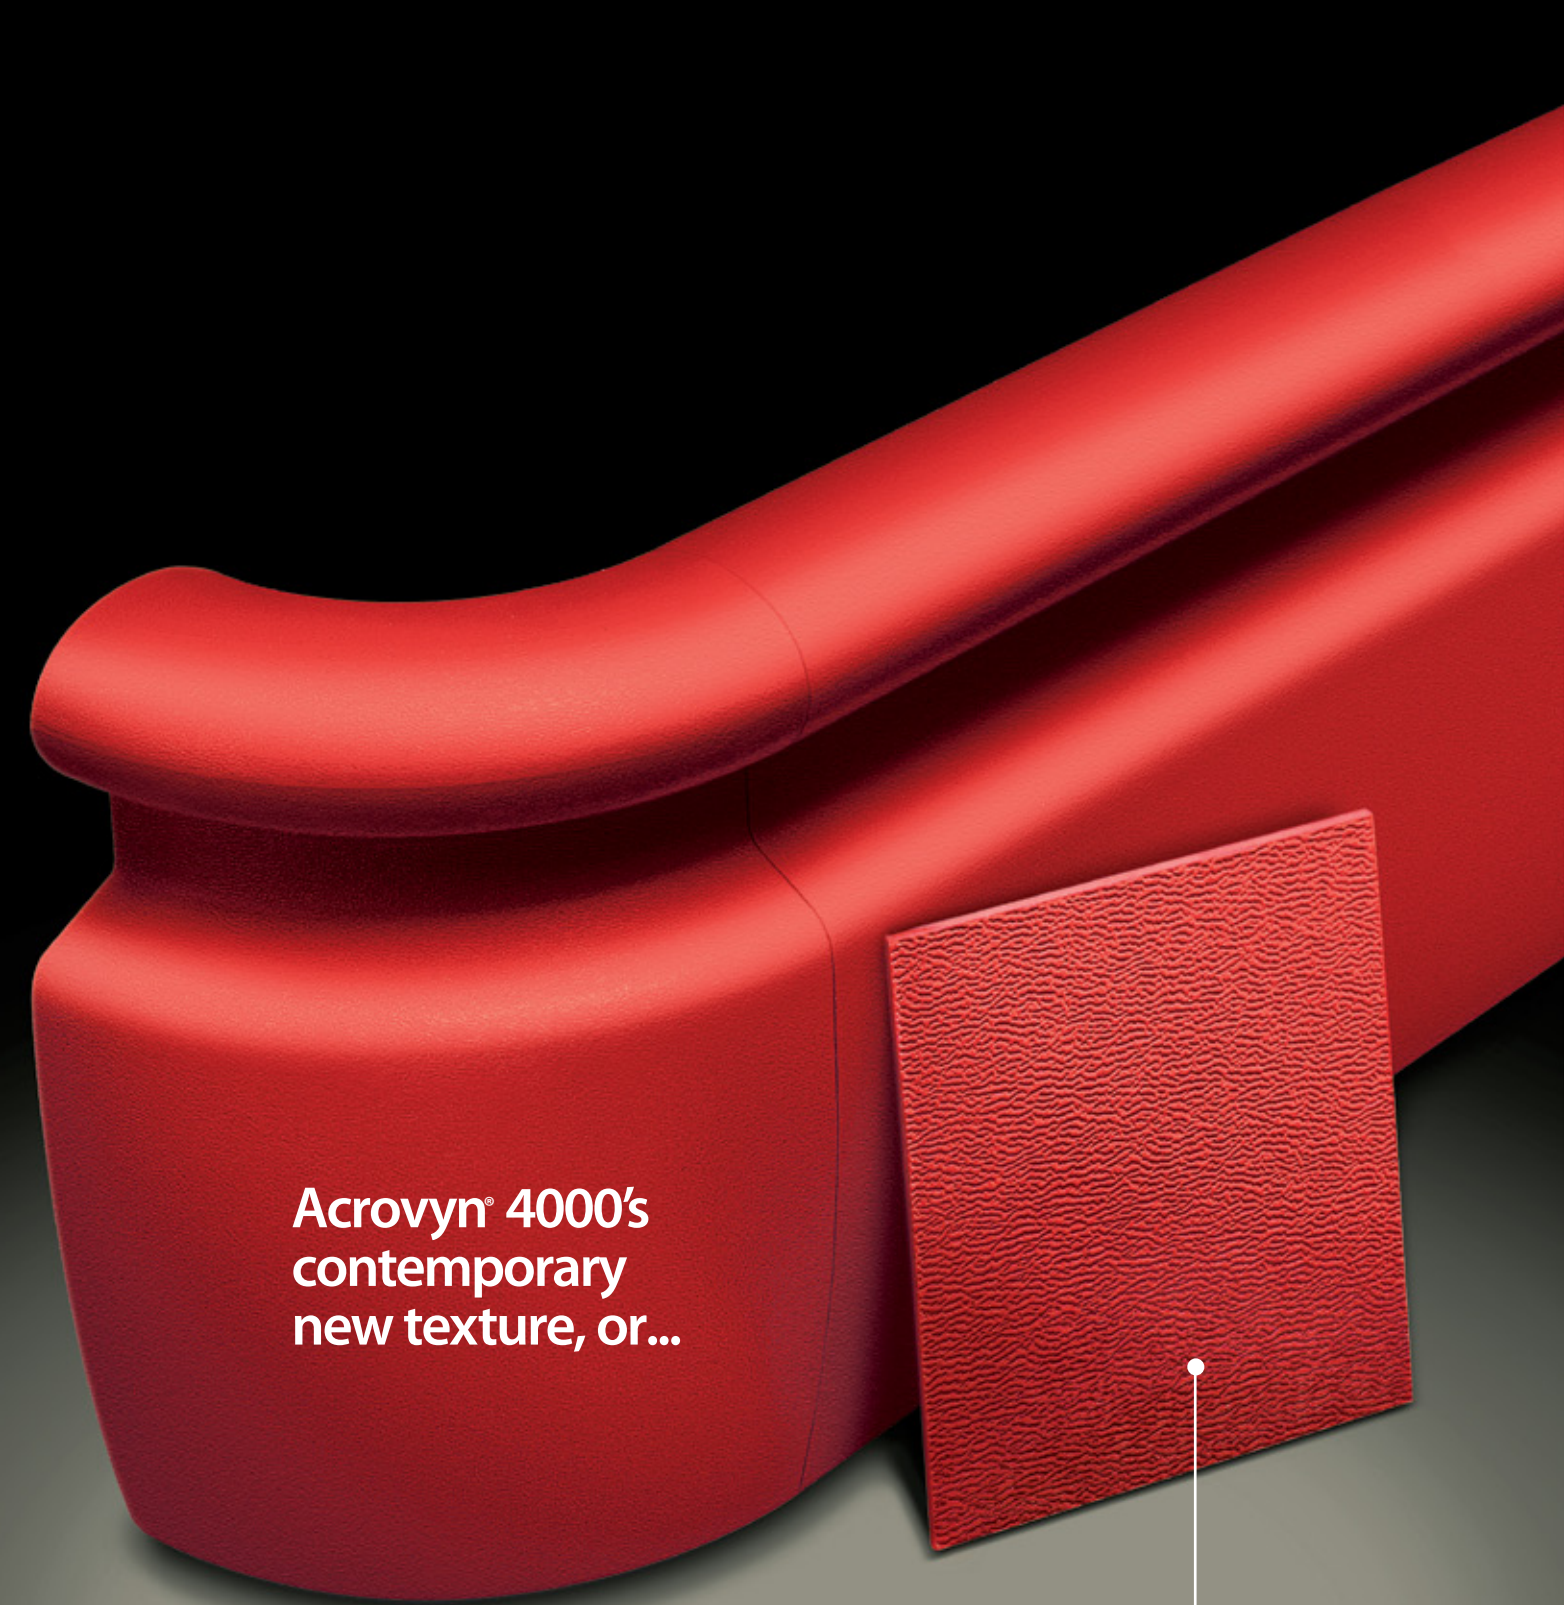

Which simulated wood looks more realistic to you?

Acrovyn® 4000 Wall Guard

Competitor Wall Guard

Acrovyn® 4000's contemporary new texture, or...

everyone else's pebblette texture?

You decide.

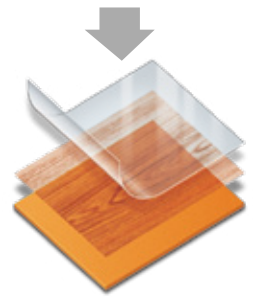

Introducing Acrovyn® 4000 Chameleon™ Simulated Wood and Metal Collection

Now PVC-free and even more realistic

Acrovyn Chameleon™ offers the industry's best looking, most durable simulated patterns available today. **The Chameleon's patterned ink and base material are completely free of PVC,** and Acrovyn 4000's new contemporary texture makes **our wall guards look even more realistic.** The smooth texture is easy to clean. Chameleon is 20 times more durable than stained wood.

Our tough, easy to clean Chameleon Collection is available on most of our products, including doors, wall coverings, wall guards and wall panels, ensuring a totally coordinated look for your interior.

Our exclusive fusion bonding process means Acrovyn 4000 simulated wood patterns won't wear, scratch or peel off. It becomes integral with the Acrovyn material.

Acrovyn Chameleon's surface cleans easily with non-abrasive cleaners.

Acrovyn Chameleon patterns are 20x more durable than stained wood and 4x more durable than laminate.

In order to plan your Acrovyn Wall Panel project to meet both your aesthetic and budgetary needs, please use the following criteria:

1 Choose Your Panel Type (choose from the selection chart on pages 50 and 51)

Cost factor: Consult one of our wall panel project managers at 800-233-8493 early in the process to help guide you to which Acrovyn wall panel system is right for you.

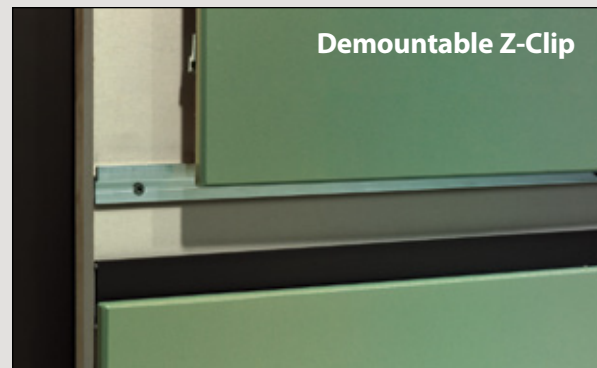

2 Choose Your Mounting System

Acrovyn Beveled Edge wall panels can be installed permanently with construction adhesive or on a demountable Z-Clip system. Each system can give you the same visual appearance. The demountable Z-Clip system allows you to remove or replace a panel without any repair work to the wall behind it.

The demountable Z-Clip system works with all C/S panel systems except the Acrovyn Square Edge Panel. The demountable panel system adds approximately 15% to the cost of a typical panel project.

All C/S panels can also be installed permanently using construction adhesive.

Complete installation instructions for all C/S panel systems can be found at www.c-sgroup.com.

Demountable Z-Clip

Permanent Adhesive

3 Design Your Panel and Joint Pattern (sizes, shapes, joints)

This is where you can have the most impact on the cost of your panel project. Simply put, the more different sizes and shapes your project calls for, the more factory fabrication will be required, resulting in a higher cost.

Note: To achieve a “molding free” look on a tighter budget, limit the number of panel sizes to a maximum of five. Cut panels only in corners and at terminations, and use moldings as necessary.

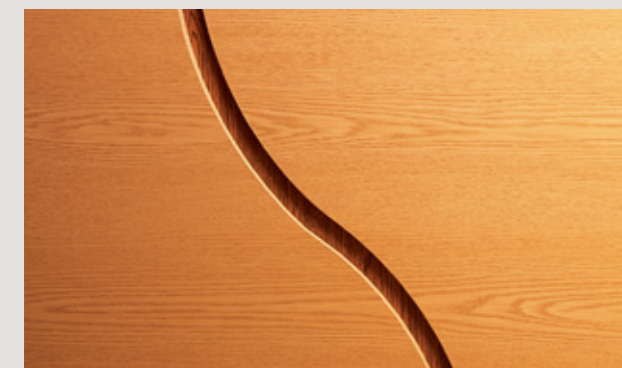

Choose from butt joints with color-matched sealants, recessed moldings or contrasting reveals.

Easily create dramatic visual accents with Acrovyn colors, patterns and textures.

Combine solid Acrovyn with Chameleon Simulated Wood and Metal Panels for visual excitement.

Acrovyn Wall Panels can be formed in virtually any shape.

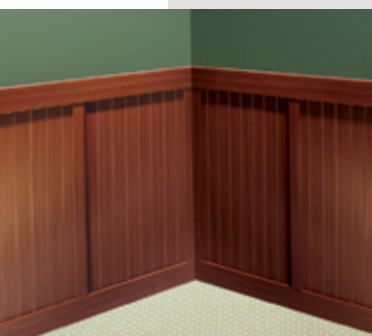

Saratoga® Series Wall System

Traditional aesthetics with the protection of Acrovyn

The Saratoga® Series wall system is ideal for high traffic areas. Key to the system is our rugged Acrovyn .040" sheet in a wide variety of colors, patterns and textures. By incorporating matching or contrasting vertical or horizontal moldings, a variety of panelized designs can be achieved. This system can be used in full height or wainscot applications. See page 68 for technical information.

Acrovyn® Doors

Great looking,
virtually indestructible
and now available
PVC-free

Acrovyn® Door Protection

Unlike standard wood or high pressure laminate doors, the new Acrovyn Door **will not tear, chip or crack.** Manufactured in our Pennsylvania plant, every door features **rugged Acrovyn laminate** that's five times as abrasion resistant as wood and **twice as resistant as HPL.** To provide additional protection for a longer door life, the stiles on the Acrovyn Door are **field replaceable if ever damaged.** All Acrovyn Doors are PVC-free.

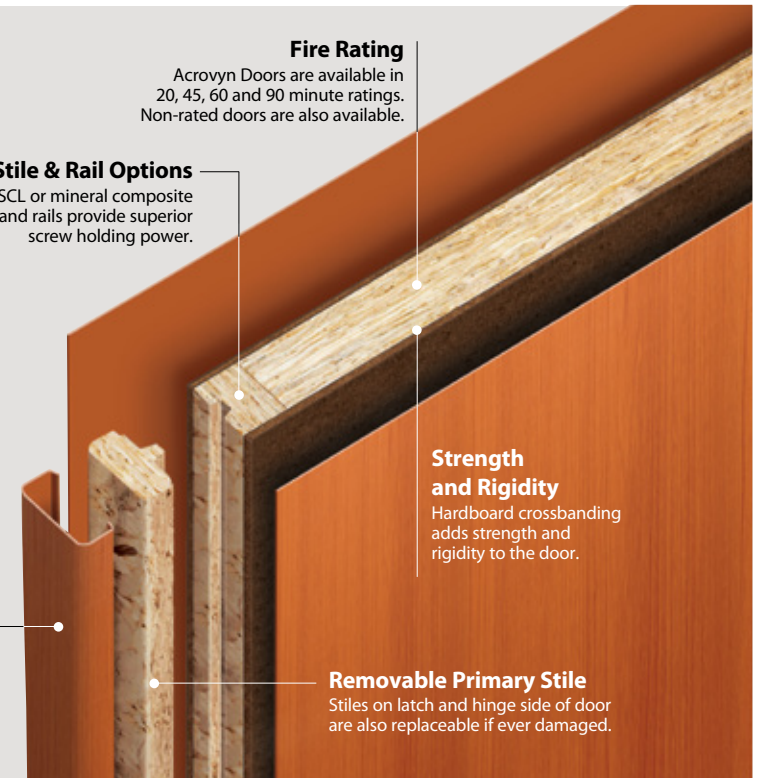

Fire Rating
Acrovyn Doors are available in 20, 45, 60 and 90 minute ratings. Non-rated doors are also available.

Stile & Rail Options
Wood, SCL or mineral composite stiles and rails provide superior screw holding power.

Strength and Rigidity
Hardboard crossbanding adds strength and rigidity to the door.

Replaceable Edge Guard

Removable Primary Stile
Stiles on latch and hinge side of door are also replaceable if ever damaged.

Acrovyn Door

Product features

Industry's most durable door
Features replaceable stiles if ever damaged
Non-Rated, 20, 45, 60 and 90 minute fire rated doors
