

Exterior Wall Flexible Seals 2"-Up

Use this cover for:

- Exterior vertical applications where weather protection is critical.
- Frames designed to attach to most external skin structures.
- 2" to 36" joint sizes with multi-directional movement.
- Factory welded transitions available.
- Four standard gasket colors (12 standard VF colors).

How it works:

C/S Exterior Flexible Seals in four standard and multiple custom colors are designed to provide weather tight, multi-directional movement on all external skin structures. These flush seals can provide up to 32" of movement in four directions.

Seismic Exterior Wall Covers 8"-Up

Use this cover for:

- Exterior seismic wall applications where cover concealment is desired within curtain wall finishes.
- Lightweight finish applications up to 9/16" thick (supplied by others).
- Zero maintenance required after an earthquake.
- Where high wind loads are expected.

How it works:

Seismic Flush Exterior Wall Covers integrate curtain wall finishes into the covers' ladder system to make the covers imperceptible. The covers release from the wall on one side to provide full seismic movement and return to the closed position after an event via its counterweight system.
