- 3 Vinyl options
- Serrated aluminium option

Aluminium rail

Vinyl End Filler

Continuous vinyl spline and cushion (open or closed)

Rail Options

*Standard

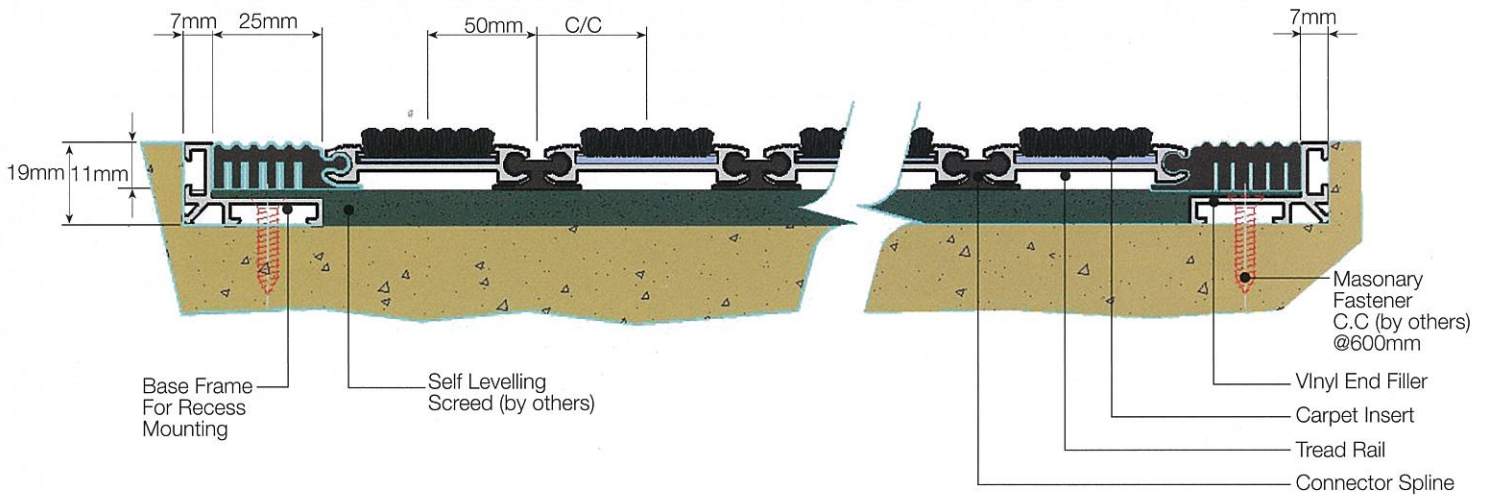

C/S PediSmart™

Siam Paragon - Thailand

C/S **PediSmart™** is the perfect entrance flooring solution for buildings in moderate use such as offices, shops, hotels, banks and building societies, and where colour and design specification is often as critical as dirt stopping capabilities.

C/S **PediSmart™** can be recess or surface mounted, either in a ramped frame or to finish level with a surrounding carpet. Carpet, vinyl or abrasive tread infills can be specified individually or in combination, along with our unique open or closed vinyl spline, which either allows waste to drop through or be retained in channels between the rails. With either option, C/S **PediSmart™** rolls up for easy under-cleaning.

C/S **PediSmart™** Product Data

- Recess or surface mounted options
- Rolls up for easy matwell cleaning
- Excellent moisture and dirt removal/containment in conjunction with C/S **Pedisystems®** patented performance textile
- Closed spline option with deep channels allows in situ cleaning along with very high dirt containment
- Open spline option allows dirt to fall into the matwell, the mat is then rolled up for matwell cleaning
- Field changeable inserts without the use of specialist tools for low lifecycle costs
- Wide range of tread options
- Wide range of colour options
- Wide range of frame options
